

Yohannes Haile

Full-Stack Developer | Next.js, React & TypeScript

+251 9 35 35 55 87 | yohannes.h93@gmail.com | LinkedIn: johnny-haile | GitHub: johaile

Professional Summary

Full-stack developer specializing in Next.js, React, TypeScript, and Node.js, with experience delivering production-ready SaaS, booking, e-commerce, and AI-powered applications. Skilled in designing responsive interfaces, secure authentication, REST APIs, and scalable relational data models. Effective in cross-functional Agile teams, from architecture and implementation through testing, deployment, and performance optimization.

Technical Skills

- **Frontend:** Next.js, React, TypeScript, Tailwind CSS, Zustand
- **Forms & UI:** Zod, React Hook Form, Radix UI, Chakra UI, Mantine UI
- **Backend:** Node.js, Express, REST APIs, Prisma, Drizzle
- **Databases:** PostgreSQL, MySQL, MongoDB, Supabase
- **Auth & Security:** Better Auth, NextAuth, OAuth, JWT, RBAC
- **Cloud & DevOps:** Vercel, Docker, Git, GitHub, CI/CD
- **AI & Data:** Python, SQL, LLM integration, CNNs, image classification
- **Additional:** JavaScript, Java, C++, PHP, Framer Motion, GSAP

Experience

Travel Ethiopia & Enjoy Ethiopia

Full-Stack Developer

Addis Ababa, Ethiopia

January 2026 – Present

- Architected a multi-brand travel platform in Next.js, consolidating separate services into a scalable shared system.
- Developed end-to-end booking workflows with secure account authentication and email verification using Better Auth.
- Modeled booking, customer, and operational data in PostgreSQL with Prisma to support complex relational workflows.
- Implemented type-safe, validated user flows with TypeScript, Zod, and React Hook Form.

EDit Educational Services PLC.

Full-Stack Developer

Addis Ababa, Ethiopia

August 2025 – December 2025

- Contributed to a three-application gamified learning platform serving students, parents, and administrators.
- Served as Scrum Master, facilitating daily stand-ups, sprint planning, and team coordination.
- Engineered secure authentication and role-based access across the student, parent, and admin applications.
- Optimized Prisma queries and data-access patterns to reduce latency and improve API responsiveness.

NextPulse Labs

Full-Stack Developer Intern

Addis Ababa, Ethiopia

June 2024 – September 2024

- Delivered custom SaaS features using Next.js and Supabase, covering frontend interfaces and data integration.
- Automated build and deployment workflows with CI/CD to support faster, more reliable releases.
- Created reusable, accessible interface components with Chakra UI and Mantine UI.

University of Gondar

Full-Stack Developer Intern

Gondar, Ethiopia

April 2023 – August 2023

- Developed an e-commerce application with the MERN stack, integrating customer-facing and administrative workflows.
- Created responsive interfaces with Tailwind CSS and interactive animations with Framer Motion.
- Designed and maintained REST APIs in Express for product, user, and order operations.

Oasis Infobyte

Frontend Developer Intern

Remote, India

May 2022 – September 2022

- Developed an issue-tracking application with Next.js and MySQL, supporting structured issue creation and management.
- Implemented responsive, accessible interfaces using Radix UI and Tailwind CSS.

Education

University of Gondar

Bachelor of Science in Computer Science

Gondar, Ethiopia

2022–2026

Relevant study: software engineering, algorithms, database systems, computer networks, and full-stack application development.

Datanomic

Data Analytics and Cloud Engineering Program

Practical training in Python, SQL, data visualization, cloud infrastructure, and scalable application deployment.

Projects

StreamFlix

Production-ready movie streaming and virtual cinema web application.

- Engineered a full-stack platform for discovering and streaming movies and television series.
- Developed room-based virtual cinemas that allow multiple users to join a shared viewing session.
- Implemented synchronized playback controls to keep participants aligned throughout each session.

RadiAid

AI-assisted brain MRI screening and image-classification web application.

- Developed a web interface for analyzing brain MRI scans and identifying potential abnormalities.
- Integrated pretrained convolutional neural network (CNN) models for medical-image classification.
- Presented predicted condition, severity estimate, and model confidence to support result interpretation.

Career Guide AI

AI-powered career planning, skill-gap analysis, and interview-preparation platform.

- Developed an AI mentor that maps career paths and identifies actionable skill gaps.
- Created interview simulations that provide immediate, personalized performance feedback.
- Integrated labor-market data into skill recommendations and built a dashboard for tracking learning progress.

Pharmacy Inventory & Delivery System

Full-stack pharmacy management & delivery platform built with Next.js ecosystem.

- Developed an operations dashboard for inventory, order processing, and delivery management.
- Implemented secure authentication and user administration with Better Auth.
- Designed delivery-tracking workflows and a scalable relational data layer with Prisma.

Car Rental Web-App

Full-stack platform with Next.js, PostgreSQL/MySQL, and ShadCN UI.

- Implemented authentication, role-based access control, and automated transactional email workflows.
- Designed real-time rental updates and a scalable data architecture for vehicles, users, and reservations.
- Built a responsive component-driven interface with ShadCN UI.

Typing Speed Racer

Desktop typing game built with JavaFX.

- Developed real-time typing-speed and accuracy tracking with a responsive JavaFX interface.
- Implemented scoring, gameplay progression, and performance feedback to increase user engagement.
